Product Change/Discontinuation Notice – Thermo Scientific National 9mm Target DP Caps and Kits with cat.no. code C4000-xxx

Dear Valued Customer,

We are pleased to announce the transition of our National 9mm Target DP Closures to our improved National AVCS – Advanced Vial Closure System - 9mm Closures. We introduced the new 9mm AVCS Closure with improved sealing that virtually eliminates septa push through.

This letter is to inform you of the catalog part number changes. All National Target DP part numbers with the **C4000-xxx** prefix will be discontinued as of **28th February 2014**. All 9mm Closures and Kits will now have the Catalog Part number with the C5000-XXX prefix.

C5000-XXX
9mm AVCS Closures

C4000-XXX
9mm Target DP Closures

This change will apply to **all closures, caps and kits with the Catalog Part Number prefix of C4000-xxx.**

This applies only to the closures and kits and the following items will maintain the C4000 prefix.

Bonded 9mm Caps and kits
Glass and plastic Vials
9mm Septa (not assembled in a cap)

What do these changes mean for you and your customers?

- Change of the catalog part numbers C4000-xxx to C5000-xxx
- Change to the new cap WILL NOT affect any product specification, septum material composition or field of application.
- No change of ordering processes

- No change to current pricing
- No change to current preferential access and key distribution status
- No change to product stock levels
- No change of product packaging
- Existing C4000-xxx National products will continue to be supplied until stock levels have been exhausted. Once exhausted, you will then **automatically** receive the C5000-xxx replacement product.

Certificates

- Outside of design changes, there will be no changes to the content of certification for MS Certified and Certified Kits

Catalogs

- Thermo Scientific 9mm AVCS C5000-xxx products will be included in our 2014/2015 Thermo Scientific Chromatography Columns and Consumables catalog.

For more information regarding our Thermo Scientific AVCS 9mm Closure innovation and to request a sample pack, please visit www.thermoscientific.com/9mm

Respectfully,

Dave Edwards

Part Number	
Product Category	Target DP 9mm Screw Thread Closures, Caps, Kits
Description	Target DP Cap/Kit, 100/PK
Existing Capability	Replaces C4000-xxx closures for Target DP 9 mm screw thread vials Replaces C4000-xxx kits
Changes	Redesigned and improved caps replace original ones It is anticipated that all applications run under the discontinued product will be accommodated by the new replacement product without adjustment to methods Septum quality or composition is not changed in any of the new caps or kits
New Features	Product Improvements: a) Improved septum positioning and centering for more secure sealing b) Ribbed and textured outer surface for easier handling c) Septum retention features to prevent septum dislodging during normal use d) Recessed resin injection point for a smooth unobstructed outer profile

AFFECTED PRODUCTS:

**discontinued
